BENEFITS OF THE S-CLASS DOOR RANGE

Our S-Class timber core composite door is the pinnacle of modern door engineering, combining durability with timeless elegance. With high quality construction, lasting performance, and stunning aesthetics, it's a door that offers both reliability and style.

Unrivaled Durability

Designed with longevity in mind, our S-Class doors combine the strength of a timber core with a Thermoplastic Coolskin outer layer. This construction prevents twisting, and cracking, even in extreme weather conditions, delivering a door that performs beautifully year after year.

Thermal Efficiency

The innovative Thermoplastic Coolskin outer layer not only enhances the door's appearance but also offers heat-reflective properties, which stops heat entering or escaping your home. It also ensures outside noise is kept to a minimum too.

Refined Wood-Grain Aesthetic

Our doors are finished with a defined wood-grain texture that replicates the natural beauty of timber, while still being low-maintenance.

Industry-Leading Standards

Built to protect, our S-Class doors are engineered to withstand the harshest conditions, providing superior weatherproofing and draught protection.

High Security Locking Systems

Every door in the S-Class Collection is equipped with an insurance-approved, high-security multi-point locking system as standard. This ensures your home and family keep safe, offering you peace of mind.

Customisation

With a wide variety of door designs, glazing choices, hardware, and colour options, you can create a bespoke door that perfectly complements your home. Every detail of our S-Class door can be tailored to reflect your personal taste and style, without compromising on performance.

HAND MADE
IN BRITAIN

BESPOKE
TO YOU

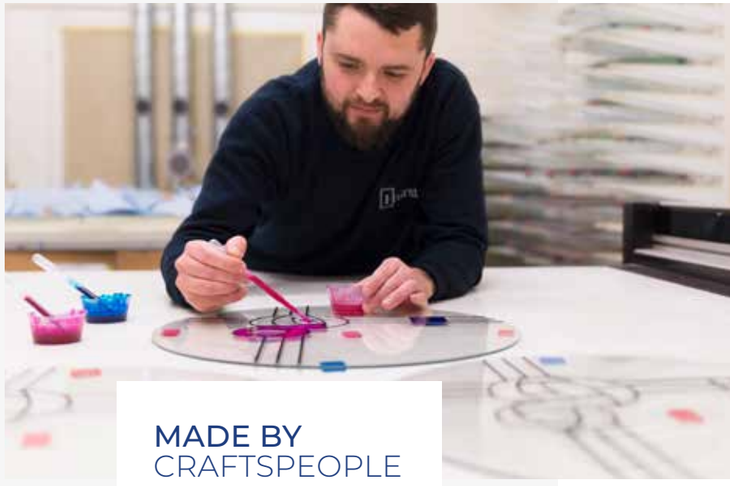
Offering one of the largest ranges of door styles, colours, glass and hardware options, each Hurst door is built to your specific requirements to provide you with your perfect door.

Proud to represent British manufacturers, Hurst Doors has been making quality doors for 30 years.

Operating from our purpose-built facility in Yorkshire and serving a national network of over 1800 independent retailers, we have grown to become one of the UK's leading manufacturers. Through our acquired knowledge and expertise we have built a respected reputation for delivering excellence in the products and service we provide.

LEADING
EDGE TECHNOLOGY

Using the latest in cutting-edge technology and machinery, each door is precision-engineered to deliver a quality product that is strong and durable. From the CNC router used to machine the door to our refined finishing processes, our attention to detail ensures your door arrives beautifully finished and built to last.



MADE BY
CRAFTSPEOPLE

Whilst we utilise the latest in machinery and technology, we also rely on the knowledge and expertise of our highly trained people to carefully craft your door. From applying the hinges and locking mechanisms, to creating beautiful glass patterns, these processes are done by hand, using the utmost of care.

TRADITIONAL DOOR STYLES

Our traditional door styles combine classic designs with a variety of colour, glazing, and hardware options, adding timeless elegance to period homes while enhancing modern properties with sophisticated style.

Thermoplastic CoolSkin outer layer with heat reflective properties and a beautiful, defined wood-grain finish.

Our standard door skins feature a deep grain texture. Enhanced with advanced CoolSkin technology, they are designed to withstand extreme temperature fluctuations while maintaining optimal performance. This technology minimises heat absorption, reducing the risk of cracking and helping to preserve the door's colour over time.

BUTTERFLY & BEE COLLECTION

Our nature inspired bee and butterfly range of glasses and hardware, will not only make a beautiful entrance for your home, it's sure to make a great first impression and be a talking point for your guests.

SANDBLASTED GLASSES

Designed to reflect the delicate nature of bees and butterflies with their finely detailed wings, our stunning and exclusive glass patterns are carefully sandblasted onto a glazed unit. This method allows lots of natural light into your home whilst also retaining your privacy.

HARMONY GLASS COLLECTION

Our exclusive Harmony Collection provides contemporary, etched effect, designs which cleverly feature on both sides of the double-glazed unit to create an elegant and striking three-dimensional effect.

If you're looking for a contemporary style that makes a real statement, our exclusive Harmony Collection features etched effect designs. These are carefully sandblasted onto both sides of a double-glazed unit and then hand-crafted to create a three-dimensional effect, which is both stylish and striking.

The designs, which are reversed on the internal side of the door, ensure a level of privacy whilst also allowing natural light to flood into your home. In sunlight, these stunning, three-dimensional effect patterns move and refract light beautifully, creating a real focal point for your entranceway.

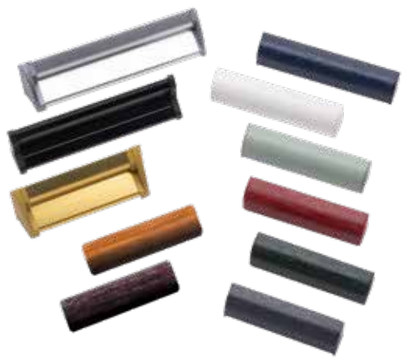
WEATHERBARS

Gold and silver effect weatherbars are fitted as standard. However, a range of weatherbars are available in a variety of colours, to complement your chosen door.



LOCKING SYSTEMS

All of our engineered locking systems meet the highest standards for enhanced security performance.

LEVER OPERATED LOCK

Doors specified with a Lever/lever and Lever/pad handle are commonly supplied with a Kubu enabled multi-point door lock as standard.

This high-performance, multi-point locking system is not only set for smart technology, it also provides one of the UK's largest hooks and centre deadbolt at 25mm, which makes for greater compression and security on a closed door.

For a smooth precise operation, the hooks are engaged when the handle lever (located halfway up the door) is lifted and then the door is simply locked/unlocked by using the key.

SLAM LOCK

This high-performance, Kubu enabled, multi-point slam lock is PAS 24 tested and generally used in conjunction with 'Pull' handles.

The mechanical self-locking system ensures that the door is securely locked against uninvited entry when simply pulled shut. As soon as the door is closed, the automatic latchbolts are secured to prevent them being forced back. From inside, the latchbolts are retracted and the door opened by using a thumbturn or key.

From outside, the latchbolts are retracted and the door opened by a simple turn of the key. The lock is positioned halfway up the door.

HERITAGE SLAM LOCK

The Heritage slam lock will help you achieve a classic door appearance which is both secure and functional.

The Heritage slam lock works in a similar way to the slam lock, although the lock is positioned two-thirds of the way up the door.

Simply by closing the door, the top and bottom latches strike the keep and fully engage to become secure deadbolts.

Ask your installer for further details on the Kubu Smart Kit.

CYLINDERS

£2000 SECURITY GUARANTEE

STANDARD CYLINDER

Meeting the requirements of Secured by Design and PAS 24, all Composite Collection doors come as standard with a Kitemarked euro cylinder which is combined with a cylinder guard to provide a TS007 3 Star security solution.

Made from hardened steel, the cylinder teamed with a cylinder guard is designed to protect against drilling, picking, twisting and bump attacks.

ABS MASTER EURO CYLINDER OPTION

Designed to protect your home against all common break-in methods, the ABS Master is a high-security 3-star Diamond-grade euro cylinder from Avocet. Featuring patented anti-snap technology, the ABS Master is engineered to defend against cylinder snapping which is one of the most common forms of forced entry.

If the cylinder is attacked, the ABS Master is designed to sacrificially break on the outside of the door, while a reinforced internal cam and intelligent break points continue to protect the locking mechanism inside. This prevents access to the door bolt and keeps your home secure, even if the external section is damaged. The cylinder also provides resistance to drilling, picking, bumping and other common attack methods.

For added reassurance, the ABS Master is supplied with a £2,000 homeowner guarantee*. In the unlikely event that a burglar gains entry by snapping the ABS Master cylinder, Avocet will pay up to £2,000* in compensation to the homeowner.

DOOR MAINTENANCE

KEEP YOUR DOOR LOOKING GREAT FOR LONGER

Your new S-Class door is extremely low maintenance and is very easy to clean. How often will depend on where you live. For instance, a coastal or industrialised location, or near a busy road, may mean cleaning is required a little more often.

With a little care and attention, your S-Class door should continue to look great for years to come!

We recommend the following to help you get the very best from your composite door:

CLEANING YOUR DOOR

- Wash the door and door frame with warm soapy water and a soft, lint-free cloth to remove grime and atmospheric deposits.
- Never use a pressure washer or steam cleaner.
- Stubborn marks on the door frame may need to be tackled with a specialised PVC cleaner but please ensure you read the cleaning guidelines carefully to ensure suitability.
- Under no circumstances should you use any solvent-based or abrasive cleaners and avoid the use of any adhesives or tack for temporary fixing i.e. For seasonal or other decorations.

MAINTAINING YOUR DOOR

- Once every six months or so, apply a little light engineering oil (such as 3 in 1 oil) on all moving parts of the lock, cylinder and hinges.
- We also strongly recommend that you help protect your door from possible natural thermal distortion by engaging the locking points by simply pulling up the handle each time you shut the door.
